SUMMARY

- Holistic, product focused designer who emphasizes usability and pays relentless attention to detail and visual execution
- Experienced with all steps of product design from feature planning, crafting polished mockups and user- testing, to technical front-end implementation

EXPERIENCE

Product Designer, Quora

Aug - Dec 2014

- Redesigned the writing experience on Quora.com from the ground up, achieving the goal of increasing generation of high quality content and collecting better signals of a user's expertise
- Provided solutions to system thinking heavy design problems, such as how stories in all feeds across the product communicate their connection to the user
- Designed mostly in browser and brought design concepts to life with production ready code in Python, Javascript, and CSS

UI/UX Designer, 500px

Jan - May 2014

- Designed beautiful, intuitive web user interfaces for sharing and discovering photography for on eof Canada's top startups
- Collaborated closely with developers on crafting new features focused on a high quality user expereince and usability
- Created pixel perfect mockups consistent with 500px's style through numerous iterations and attention to detail
- Coded responsive prototypes with HTML/CSS and JavaScript

Lead mobile UI/UX Designer, uMentioned

Jan - May 2014

- Designed a mobile social networking app for college students
- Attracted over 30,000 users within first month of launch and over a million interactions daily
